- Remove the three engine case bolts arrowed in picture 2. Hold the cover loosely over the case to help identify the correct ones. **DO NOT REMOVE ALL OF THE CASE BOLTS.**
- Fit the three spacers into the three holes inside the engine case cover (these should be a tight fit to secure in position while fitting, once tightened they will remain in position).
- Offer up the R&G cover to the engine and carefully fit it over the engine casing. Ensure that the three R&G bolts are lined up with the holes in the engine casing, and then push on as far as it will go.
- Fit the bolts with washers through the Engine Case Cover and into the engine case.
- With a 4mm Allen key tighten the bolts equally so that they pull the cover into place. **DO NOT FULLY TIGHTEN.**
- Finally use a torque wrench set at 10 Nm (7 Lb ft) to fully tighten.
- It is suggested that you check the tightness of the mounting bolts on a regular basis i.e. when cleaning or once a month.
- **NOTE** for the cleaning of this product you should only use a soft polishing cloth and a mild general cleaning agent.
- **AVOID HARMFUL CHEMICALS. IF IN DOUBT DO NOT USE AS THEY COULD ALTER THE STRENGTH OF THE COVER.**
- R&G will accept no liability if the above procedure and torque settings are not followed.
- Re-fit the belly pan as original.
