

FITTING INSTRUCTIONS FOR KTM LC 4 FORK PROTECTORS (CODES FP0024BK for '04 onwards and FP0040BK for up to '03)

Please note that the way the kit is packed does not necessarily represent the way of mounting to the bike

- Undo front wheel spindle nut (left side as you sit on bike) and remove
- Slide steel bar through the hollow spindle
- Knock the steel bar so that it pushes out the cap on the end of the right side of the spindle
- Insert the R&G cap over the right side and screw the R&G-supplied nut over the left side
- Place the black bobbins over the cap and the nut
- Place the supplied washers over the ends of the steel bar and then secure the supplied nyloc nuts onto the ends. Do not overtighten (this would damage the nylocs) – the nyloc nuts will hold tight. Just tighten them until they lock.
